

RAIHAN AKBAR GUNAWAN

raihanakbarg28@gmail.com | linkedin.com/in/rhakbr | github.com/rhankbrguw | Jakarta, Indonesia

PROFESSIONAL SUMMARY

Fullstack Developer experienced in building production-grade web and mobile applications with React, Laravel, Go, and Flutter. Skilled in secure backend architecture, role-based access control, and integrating AI features into real-world systems. Active contributor and mentor within campus tech communities.

EDUCATION

Esa Unggul University <i>Bachelor of Computer Science</i>	Jakarta, Indonesia 2023 – 2027
---	-----------------------------------

EXPERIENCE

Core Team – Curriculum <i>Google Developer Group on Campus (GDGoC), Esa Unggul University</i>	Oct. 2025 – Present Jakarta, Indonesia
- Collaborated with cross-functional teams to plan and deliver community initiatives, strengthening technical engagement across campus - Mentored students through hands-on sessions, including Study Jams and seminars - Led development of a submission system using Go and React, with JWT authentication, RBAC, and an integrated admin dashboard	
Fullstack Developer (Internship) <i>PT Mitra Cerdas Nusantara</i>	Aug. 2025 – Jan. 2026 Jakarta, Indonesia (Remote)
- Developed full-stack web applications using React and Laravel across the frontend and backend - Implemented JWT authentication with React state management to secure user sessions - Standardized development environments with Docker and Docker Compose, improving onboarding and deployment consistency - Built a server-driven SPA with Inertia.js to streamline frontend-backend integration	

PROJECTS

Mobatech Healthcare Ecosystem <i>Go, Flutter, Next.js, Python, MySQL</i> GitHub	May 2026 – Jul. 2026
- Built a microservice hospital management system with a Go REST API, Flutter client, and Next.js dashboard, encrypting patient records with AES-256 - Integrated Gemini AI with a Python RAG pipeline to power symptom analysis and automate retrieval of doctor schedules and facility data	
AgriSync <i>Supabase, React, Zustand, PostgreSQL</i> GitHub	Feb. 2026 – Apr. 2026
- Built a multi-tenant plantation management and field-reporting platform, letting multiple organizations track field operations from one dashboard - Enforced tenant data isolation with Supabase Row-Level Security policies and vault-managed secrets on PostgreSQL - Automated report webhooks and email alerts with Edge Functions and the Resend API	
Inventory Management System <i>Laravel, React, Inertia.js, MySQL</i> GitHub	Aug. 2025 – Jan. 2026
- Built a containerized, role-based inventory platform with onboarding wizards and real-time transaction dashboards across multiple locations - Secured workflows with centralized permissions and audit-trail logging for accountability across user roles	
El Ngadu <i>PHP, React, MySQL</i> GitHub	Mar. 2025 – Aug. 2025
- Built a full-stack complaint management system with role-based access for admin and user workflows - Designed a case-tracking pipeline to log, assign, and monitor complaints end-to-end	
Rumah Kosim Books <i>SvelteKit, MySQL</i> GitHub	Sep. 2024 – Jan. 2025
- Built a full-stack bookstore app with user authentication and session management - Implemented CRUD functionality for inventory and catalog management	

CERTIFICATIONS

Go (Intermediate) Skill Certification <i>HackerRank</i>	Jul. 2026
React (Basic) Skill Certification <i>HackerRank</i>	Jul. 2026
EF SET English Certificate (C2 Proficient) <i>EF Standard English Test</i>	2026

TECHNICAL SKILLS

Languages: Dart, Go, JavaScript, PHP, TypeScript

Frameworks: Flutter, Laravel, Next.js, Node.js, React.js, SvelteKit, TailwindCSS

Databases: MySQL, PostgreSQL, Redis

Developer Tools: Docker, Figma, Git, Linux, Notion, Postman

Spoken Languages: English (C2), Indonesian (Native)
